

QCPCColorScale::rescaleData
Range

QCPCColorMap::setData

QCPCColorMap::updateLegendIcon

QCPCColorMap::data

```
graph LR; A[QCPCColorScale::rescaleData Range] --> D[QCPCColorMap::data]; B[QCPCColorMap::setData] --> D; C[QCPCColorMap::updateLegendIcon] --> D;
```

The diagram illustrates a dependency or data flow. On the left, three white rectangular boxes with black borders contain the following text: 'QCPCColorScale::rescaleData Range' (top), 'QCPCColorMap::setData' (middle), and 'QCPCColorMap::updateLegendIcon' (bottom). On the right, a gray rectangular box with a black border contains the text 'QCPCColorMap::data'. Three blue arrows originate from the right side of each white box and point towards the left side of the gray box, indicating that each function on the left interacts with or updates the 'data' attribute of the 'QCPCColorMap' object.
