

MainWindow::on\_pushButton  
\_result\_archived\_export  
\_clicked

MainWindow::on\_pushButton  
\_result\_display\_archivedGraph  
\_clicked

MainWindow::plotGraphById

```
graph LR; A["MainWindow::on_pushButton  
_result_archived_export  
_clicked"] --> C["MainWindow::plotGraphById"]; B["MainWindow::on_pushButton  
_result_display_archivedGraph  
_clicked"] --> C;
```

The diagram illustrates a function call relationship. Two source functions, 'MainWindow::on\_pushButton\_result\_archived\_export\_clicked' and 'MainWindow::on\_pushButton\_result\_display\_archivedGraph\_clicked', are shown in white boxes on the left. Two blue arrows point from these source functions to a target function, 'MainWindow::plotGraphById', which is shown in a gray box on the right.
