

QCustomPlot::selectedItems

```
graph LR; A[QCustomPlot::selectedItems] --> B[QCustomPlot::item]; A --> C[QCPAbstractItem::selected];
```

The diagram illustrates the relationship between the `selectedItems` property of `QCustomPlot` and the `item` property of `QCustomPlot::item` and the `selected` property of `QCPAbstractItem`. The `selectedItems` property is shown in a gray box, while the other two are in white boxes. Blue arrows indicate that `selectedItems` is a list of `QCustomPlot::item` objects, each of which is a `QCPAbstractItem` with a `selected` state.
