

QCPIItemText::anchorPixel
Position

QCPIItemText::draw

QCPIItemText::selectTest

QCPIItemText::getTextDraw
Point

```
graph LR; A[QCPIItemText::anchorPixel Position] --> D[QCPIItemText::getTextDraw Point]; B[QCPIItemText::draw] --> D; C[QCPIItemText::selectTest] --> D;
```

The diagram illustrates a dependency or relationship where three methods from the QCPIItemText class (anchorPixel Position, draw, and selectTest) all point to a single method, QCPIItemText::getTextDraw Point. The arrows indicate that the first two methods depend on the target method, while the third method appears to call it.
