QCPAxisTicker::createTick
Vector

```
graph LR; A[QCPAxisTickerDateTime::createTickVector] --> D[QCPAxisTicker::createTickVector]; B[QCPAxisTickerLog::createTickVector] --> D; C[QCPAxisTicker::generate] --> D;
```

The diagram illustrates a function inheritance or delegation pattern. Three source functions on the left are connected by blue arrows to a single target function on the right. The target function, 'QCPAxisTicker::createTickVector', is highlighted with a gray background, while the source functions have white backgrounds. The arrows originate from the bottom-right of the first box, the right side of the second box, and the top-right of the third box, all converging on the left side of the target box.
