

QCPPolarGrid::QCPPolarGrid

```
graph LR; A[QCPPolarGrid::QCPPolarGrid] --> B[QCPPolarGrid::setAngularSubGridPen];
```

The diagram illustrates a function call within a C++ class. On the left, a white rectangular box with a black border contains the text 'QCPPolarGrid::QCPPolarGrid', representing the constructor of the QCPPolarGrid class. A blue arrow points from this box to a gray rectangular box on the right. The gray box contains the text 'QCPPolarGrid::setAngularSubGridPen', representing a member function of the same class. This indicates that the constructor calls the setAngularSubGridPen function.

QCPPolarGrid::setAngular
SubGridPen
