

QCPPolarAxisAngular
::mouseMoveEvent

QCPPolarAxisAngular
::wheelEvent

QCPPolarAxisAngular
::pixelToCoord

```
graph LR; A[QCPPolarAxisAngular::mouseMoveEvent] --> C[QCPPolarAxisAngular::pixelToCoord]; B[QCPPolarAxisAngular::wheelEvent] --> C;
```

The diagram illustrates a mapping from two source functions to a single target function. On the left, two white rectangular boxes with black borders contain the text 'QCPPolarAxisAngular::mouseMoveEvent' and 'QCPPolarAxisAngular::wheelEvent'. On the right, a gray rectangular box with a black border contains the text 'QCPPolarAxisAngular::pixelToCoord'. Two blue arrows originate from the right side of the left boxes and point towards the left side of the gray box, indicating that both source functions are mapped to the target function.
