

QCPPolarAxisAngular
::setSubTickLength

```
graph LR; A[QCPPolarAxisAngular::setSubTickLength] --> B[QCPPolarAxisAngular::setSubTickLengthIn]; A --> C[QCPPolarAxisAngular::setSubTickLengthOut];
```

The diagram illustrates the inheritance of the `setSubTickLength` method from the `QCPPolarAxisAngular` class to its two subclasses. A central box on the left, representing the base class, has two blue arrows pointing to two boxes on the right, representing the subclasses.

QCPPolarAxisAngular
::setSubTickLengthIn

QCPPolarAxisAngular
::setSubTickLengthOut
