

QCPPolarGraph::deselectEvent

QCPPolarGraph::selectEvent

QCPPolarGraph::setSelection

```
graph LR; A[QCPPolarGraph::deselectEvent] --> C[QCPPolarGraph::setSelection]; B[QCPPolarGraph::selectEvent] --> C;
```

The diagram illustrates a relationship between three methods of the QCPPolarGraph class. On the left, two methods are listed in white boxes: QCPPolarGraph::deselectEvent (top) and QCPPolarGraph::selectEvent (bottom). On the right, a single method is listed in a gray box: QCPPolarGraph::setSelection. Two blue arrows point from the right side of the left boxes to the left side of the gray box, indicating that both deselectEvent and selectEvent call or invoke setSelection.
