

MainWindow::on_pushButton
_result_archived_displayResult
_clicked

MainWindow::on_pushButton
_result_archived_export
_clicked

MainWindow::getResultById

```
graph LR; A["MainWindow::on_pushButton  
_result_archived_displayResult  
_clicked"] --> C["MainWindow::getResultById"]; B["MainWindow::on_pushButton  
_result_archived_export  
_clicked"] --> C;
```

The diagram illustrates a call graph where two distinct function calls from the MainWindow class converge on a single target function. The first call, 'MainWindow::on_pushButton_result_archived_displayResult_clicked', originates from the top-left box. The second call, 'MainWindow::on_pushButton_result_archived_export_clicked', originates from the bottom-left box. Both calls are represented by blue arrows pointing towards the 'MainWindow::getResultById' function, which is located in a grey box on the right side of the diagram.
